

The laundry sheet is a modern and practical form of laundry product. It comes in the form of a thin sheet of soluble material, pre-dosed with the necessary amount of detergent for a single load of laundry.

Users can simply throw the sheet directly into the drum of the washing machine, where it dissolves completely upon contact with water, releasing the detergent to clean clothes.

Laundry sheets are a lightweight, compact alternative to liquid or powder detergents, providing a convenient solution for laundry while reducing plastic packaging waste.

## FEATURES, ADVANTAGES AND BENEFITS

- Powered by plants
- Zero waste
- No mess
- Readily Bio-degradable (OECD 301B)
- Hypoallergenic Ingredients
- For standard & HE machines
- 100% Dissolvable
- No Phosphate, No Optical Brightener, No Bleach
- Plastic-free recyclable and biodegradable packaging
- Low Carbon Transit Footprint
- No testing On Animals
- No Animal Byproducts

## Instructions for top loader washers

Fill the washer

Divide the sheet

Place the sheet on clothing and under the stream of water

Start the wash cycle

## Instructions for use for front loader washers

Divide the sheet

Place the sheet in the washer

Fill the washer

Start the wash cycle
