

# Practical Guide to housekeeping

Shower and bath cleaning in **8** easy steps

## Follow the Leader!

To properly clean a shower, follow these steps for sparkling results:

**1 Preparation:** Gather all the cleaning supplies you will need, such as bathroom cleaners, a sponge, scrub brush, household gloves and clean rags.

**2 Pre-rinse:** Before you start cleaning, rinse the shower walls with hot water to remove soap and shampoo residue.

**3 Cleaning walls and tiles:** Spray or apply bathroom cleaner to walls, tiles and grout. Leave for a few minutes to dissolve soap and mildew deposits. Use a sponge or soft brush to scrub, paying particular attention to stained or dirty areas.

**4 Cleaning the shower door or curtain:** If you have a glass shower door or shower curtain, clean them using a glass cleaner. Be sure to rinse and dry thoroughly after cleaning.

**5 Cleaning the grout:** If the joints between the tiles are dirty or moldy, apply a mildew product to the joints and leave to act. Then scrub gently with a brush to remove dirt and mold.

**6 Rinsing:** Rinse all surfaces thoroughly with hot water to remove cleaner residue and deposits.

**7 Drying:** Wipe all surfaces with a clean cloth or squeegee to avoid water spots and help prevent future buildup of deposits.

**8 Regular Maintenance:** To prevent dirt and residue from building up, clean your shower regularly by following these steps or performing a quick wipe after each use.

By following these steps, you should be able to keep your shower clean and fresh, providing a clean and welcoming relaxation space.
