

Practical Guide to housekeeping

Cleaning
windows

8

easy
steps

Follow the Leader!

For effective, streak-free window cleaning,
follow these simple steps:

1

Prepare materials: Gather all necessary materials, including window cleaner, microfiber cloths or paper towels, spray bottle (if necessary), sponge or scraper, and possibly a step stool or ladder if the windows are difficult to access.

2

Dust the windows: Before you start cleaning, remove dust, cobwebs and large debris from the windows using a dry cloth or feather duster. This will prevent spreading dirt while cleaning.

3

Prepare the cleaner: If using a concentrate, read the directions for dilution.

5

Clean the windows: Use a microfiber cloth, paper towel or sponge to gently scrub the glass in a circular or vertical motion. For more stubborn stains, use a squeegee or window scraper, taking care not to scratch the glass.

4

Apply the cleaner: Spray or apply the cleaner onto the surface of the glass, evenly covering the area to be cleaned. Do not add too much to avoid excessive dripping.

6

Wipe away streaks: After cleaning the entire surface, wipe away remaining streaks using a clean, dry cloth or paper towels. Make sure the glass is completely dry to avoid drying marks.

7

Check and reclean if necessary: Inspect the glass carefully to make sure it is clean and streak-free. If you notice areas that are still dirty, repeat the cleaning steps on those specific areas.

8

Clean the window frames: Don't forget to also clean the window frames and sills for a complete and neat finish.

Remember to work in appropriate conditions, choosing a cloudy or sunless day to prevent the cleaner from drying too quickly and leaving streaks. Following these steps will help you achieve clean, sparkling windows.
