

Did you know?

What is FSC?

The Forest Stewardship Council (FSC) provides the world's most trusted responsible forest management solution.

It is a non-profit organization that certifies more than 200 million hectares of forests on the planet. The FSC Responsible Forestry Standard, linked to rigorous chain-of-custody certification, is a proven natural solution to meeting modern climate and biodiversity challenges. This is why environmental groups, NGOs, consumers and businesses trust us.

The FSC forest certification system is the most recognized and rigorous, and the FSC "hook and tree" label, affixed to millions of products around the world, guarantees sustainable sourcing, from the forest to the forest, to the consumer. By choosing and supporting FSC, you are helping to protect the future of forests and the communities that depend on them.
