+ Add Bot

Professional vacuum cleaning robot with docking station and fleet management.

The **S170 Navi 2** revolutionizes professional floor cleaning in large office buildings (banks, insurance companies, software companies, governments, ...), the hotel industry, care facilities, cruise ships, and many more. Specially built for use on single small to medium-sized surfaces and thanks to the docking station with replaceable dust bags, even for long periods of time without human intervention.

The **S170 Navi** is ideal for use on hardfloors or short pile carpets, whether full or partial.

Cleanfix S170 Navi 2. Generation #FBOT3

Software : Control and fleet management by FieldBots OS.
